# **Our ACTIVITIES**

## Learning Outcomes

### The young participants

- improve their knowledge, skills and competences which enhance employability and improve career prospects in the Audiovisual and Arts sector
- increase their sense of initiative and entrepreneurship
- enhance their intercultural awareness and their more active participation in society, in intercultural dialogue, social inclusion and solidarity activities
- increase their awareness of the European project and the EU values and their active citizenship and participation in democratic rituals within Europe
- learn to self expression and increase their self-empowerment and self-esteem
- improve the use of mother tongue and foreign language competences
- increase their motivation for taking part in future relevant mobility projects

### In the long run,

- the project is expected to have a significantly positive impact beyond the young participants and the organisations involved, on the communities in which the activities take place, as well as on the youth field itself and the European economic and societal sectors at large.

This is meant to have an impact on the systems of education, training and youth in the participating countries, thus stimulating policy reforms and attracting new resources for mobility opportunities in Europe and beyond.
